DETAIL SCHEDULES OF INVESTMENT SECURITIES  
AND INDEPENDENT AUDITORS' REPORT**

**August 31, 2010**

## Independent Auditors' Report

The Board of Regents of The University of Texas System  
The Board of Directors of The University of Texas Investment Management Company

We have audited, in accordance with auditing standards generally accepted in the United States of America, the financial statements of the Permanent University Fund (the "PUF"), as of and for the year ended August 31, 2010, and have issued our unqualified report thereon dated October 29, 2010. We have also audited the accompanying schedule of PUF's equity securities (Schedule A), preferred stocks and convertible securities (Schedule B), purchased options (Schedule C), debt securities (Schedule D), investment funds (Schedule E), cash and cash equivalents (Schedule F), hedge fund investment pools (Schedule G), and the private investment pools (Schedule H) as of August 31, 2010. These schedules are the responsibility of the Fund's management. Our responsibility is to express an opinion on these Schedules based on our audit.

In our opinion, the Schedules referred to above, when read in conjunction with the financial statements of the PUF referred to above, present fairly, in all material respects, the information set forth therein.

*Deloitte & Touche LLP*

## PERMANENT UNIVERSITY FUND

*Notes to Financial Statements (cont.)*

---

### Note 1 – Organization

The Permanent University Fund (PUF) is a state endowment contributing to the support of eligible institutions of The University of Texas System (UT System) and The Texas A&M University System (TAMU System). The PUF was established in the Texas Constitution of 1876 through the appropriation of land grants previously given to the University of Texas, as well as an additional one million acres. Additional land grants to the PUF were completed in 1883 with the contribution of another one million acres. Today, the PUF contains over 2.1 million acres of land located primarily in 19 counties in West Texas (PUF Lands).

PUF Lands are managed by UT System administration and produce two streams of income: mineral and surface. UT System administration remits mineral income to the PUF, and distributes surface income to the Available University Fund (AUF). The mineral income retained by the PUF is invested and managed by The University of Texas Investment Management Company (UTIMCO).

### Note 2 – Significant Accounting Policies

**(A) Security Valuation** -- Investments with readily determinable fair values are primarily valued on the basis of market valuations provided by independent pricing services.

Fixed income securities held directly by the PUF are valued based upon prices supplied by FT Interactive Data and other major fixed income pricing services, external broker quotes and internal pricing matrices.

Equity security fair values are based on the New York Stock Exchange composite closing prices, if available. If not available, the fair value is based on the closing price on the primary exchange on which the security is traded (if a closing price is not available, the average of the last reported bid and ask price is used).

Private investment funds and certain other equity securities are fair valued by management. The fair values of these investments are estimated by management using the investment's capital account balance at the closest available reporting date, as communicated by the investment manager, adjusted for contributions and withdrawals subsequent to the latest available reporting date as well as consideration of any other information, which has been provided by the investment manager or other source. In rare cases the private investment funds are valued at cost, but only when management feels this is the best approximation of value. As of August 31, 2010 and 2009, investments in private investment funds in the amount of \$2,386,892,454 and \$2,193,916,534 have been estimated by management.

Hedge funds, developed country equity, emerging markets equity and fixed income investment funds and certain other private placements are fair valued by management based on net asset value information provided by the investment manager as well as other relevant factors as indicated above. As of August 31, 2010 and 2009, investments in these funds in the amount of \$4,413,432,410 and \$3,619,077,674, respectively, have been estimated by management.

The statements of fiduciary net assets include investments in private investment funds and hedge funds as described above valued in the aggregate at \$6,800,324,864 (63.4% of net assets) and \$5,812,994,208 (60.1% of net assets) as of August 31, 2010, and August 31, 2009, respectively,

## PERMANENT UNIVERSITY FUND

*Notes to Detail Schedules of Investment Securities (cont.)*

---

whose fair values have been estimated by management in the absence of readily determinable fair values.

Securities held by the PUF in index and exchange traded funds are generally valued as follows:

Long and short stock positions traded on security exchanges are valued at closing market prices on the valuation date.

Long and short stock positions traded on the over-the-counter market are valued at the last reported bid price, except for National Market System OTC stocks, which are valued at their closing market prices.

Fixed income securities are valued based upon bid quotations obtained from major market makers or security exchanges.

Investments in registered U.S. mutual funds are valued at their respective net asset value per share amounts.

**(B) Foreign Currency Translation** -- The accounting records of the PUF are maintained in U.S. dollars. Investments in securities are valued at the daily rates of exchange on the valuation date. Purchases and sales of securities of foreign entities and the related income receipts and expense payments are translated into U.S. dollars at the exchange rate on the dates of the transactions. The PUF does not isolate that portion of the results of the change in fiduciary net assets resulting from changes in foreign exchange rates on investments from fluctuations arising from changes in market prices of securities held. Such fluctuations are included with the net increase (decrease) in investments.

**(C) Security Transactions** -- Security transactions are recorded on a trade date basis. Gains and losses on securities sold are determined on the basis of average cost.

**(D) Use of Estimates** -- The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results could differ from these estimates.

### **Note 3 – Investment Risk**

The investment risk disclosure that follows relates to the PUF's investments before securities lending transactions and the investment of cash collateral. Disclosures relating to securities lending are provided in Note 4. Risk disclosures relating to the PUF's investments in hedge funds, private investments, and public market funds are discussed in Note 5.

#### **(A) Credit Risk**

Article VII, Section 11b of the Texas Constitution authorizes the UT Board, subject to procedures and restrictions it establishes, to invest the PUF in any kind of investment and in amounts it considers appropriate, provided that it adheres to the prudent investor standard. This standard provides that the UT Board, in making investments, may acquire, exchange, sell, supervise, manage, or retain, through

## PERMANENT UNIVERSITY FUND

*Notes to Detail Schedules of Investment Securities (cont.)*

---

procedures and subject to restrictions it establishes and in amounts it considers appropriate, any kind of investment that prudent investors, exercising reasonable care, skill and caution, would acquire or retain in light of the purposes, terms, distribution requirements, and other circumstances of the fund then prevailing, taking into consideration the investment of all of the assets of the fund rather than a single investment.

Credit risk is the risk that an issuer of an investment will not fulfill its obligation to the holder of the investment. This is measured by the assignment of a rating by a nationally recognized statistical rating organization (NRSRO). The PUF's investment policy does not provide specific requirements or limitations with regards to investment ratings. Per GASB Statement No. 40 (GASB 40), *Deposit and Investment Risk Disclosures, an amendment to GASB Statement No. 3*, unless there is information to the contrary, obligations of the U.S. government or obligations explicitly guaranteed by the U.S. government are not considered to have credit risk and do not require disclosure of credit quality. GASB 40 also provides that securities with split ratings, or a different rating assignment between NRSROs, are disclosed using the rating indicative of the greatest degree of risk. The following table presents each applicable investment type grouped by rating at August 31, 2010 and 2009:

# PERMANENT UNIVERSITY FUND

## PERMANENT UNIVERSITY FUND

*Notes to Detail Schedules of Investment Securities (cont.)*

---

### **(B) Concentrations of Credit Risk**

The PUF's investment policy statement contains the limitation that no more than 5% of the market value of fixed income securities may be invested in corporate or municipal bonds of a single issuer. As of August 31, 2010 and 2009, the PUF does not hold any direct investments in any one issuer of corporate or municipal bonds that is 5% or more of the market value of the PUF's fixed income investments.

### **(C) Custodial Credit Risk**

Custodial credit risk for deposits is the risk that, in the event of the failure of a depository financial institution, the PUF will not be able to recover its deposits or will not be able to recover collateral securities that are in the possession of an outside party. The custodial credit risk for investments is the risk that, in the event of the failure of the counterparty to a transaction, the PUF will not be able to recover the value of its investment or collateral securities that are in the possession of another party. Texas State Statutes and the PUF's investment policy statements do not contain legal or policy requirements that would limit the exposure to custodial credit risk for deposits or investments. As of August 31, 2010 and 2009, the PUF does not have any deposits or investments that are exposed to custodial credit risk.

### **(D) Interest Rate Risk**

Interest rate risk is the risk that changes in market interest rates will adversely affect the value of an investment. Generally, the longer the maturity of an investment, the greater the sensitivity of its value to changes in market interest rates. Interest rate risk inherent in the PUF is measured by monitoring the modified duration of the overall investment portfolio. Modified duration estimates the sensitivity of the PUF's investments to changes in interest rates. The PUF has no specific policy statement limitations with respect to its overall modified duration. The following table summarizes the PUF's modified duration by investment type at August 31, 2010 and 2009:

The PUF has purchased options on ten year constant maturity swaps, with expiries ranging from five to seven years, as insurance against possible future increases in inflation. As of August 31, 2010 and 2009, these options had a notional value of \$2,056,000,000 and a fair value of \$7,110,685 and \$17,500,117, respectively. The risk of loss on these options is limited to the premiums paid by the PUF upon the purchase of the options, which totaled \$11,002,813 as of August 31, 2010 and 2009. It is estimated that these options would adjust the 2010 duration of total debt securities of 5.61 downward by approximately 0.24, and the total duration of 2.86 downward by approximately 0.21. It is estimated that these options would adjust the 2009 duration of total debt securities of 4.90 downward by approximately 0.56, and the total duration of 2.99 downward by approximately 0.37. One of the PUF's external managers also use options and interest rate and credit default swaps to

## PERMANENT UNIVERSITY FUND

*Notes to Detail Schedules of Investment Securities (cont.)*

---

modify the duration of their portfolios in a cost efficient manner. It is estimated by management that these positions held by external managers would not significantly adjust the duration of the PUF as presented above.

### ***(E) Investments with Fair Values That Are Highly Sensitive to Interest Rate Changes***

The PUF may invest in various mortgage backed securities, such as collateralized mortgage backed obligations. The PUF also may invest in investments that have floating rates with periodic coupon changes in market rates, zero coupon bonds and stripped Treasury and Agency securities created from coupon securities. No percentage of holdings limitations are specified in the investment policy statements regarding these types of securities. As of August 31, 2010 and 2009, the PUF's investments include the following investments that are highly sensitive to interest rate changes:

Collateralized mortgage obligations which are subject to early payment in a period of declining interest rates. The resultant reduction in expected total cash flows will affect the fair value of these securities. These securities amounted to \$257,260,201 and \$272,486,259 as of August 31, 2010 and 2009, respectively.

Mortgage backed securities which are subject to early payment in a period of declining interest rates. The resultant reduction in expected total cash flows will affect the fair value of these securities. These securities amounted to \$44,603,974 and \$138,589,867 as of August 31, 2010 and 2009, respectively.

Asset backed securities which are backed by home equity loans, auto loans, equipment loans and credit card receivables. Prepayments by the obligees of the underlying assets in periods of decreasing interest rates could reduce or eliminate the stream of income that would have been received. These securities amounted to \$20,743,629 and \$37,549,073 as of August 31, 2010 and 2009, respectively.

### ***(F) Foreign Currency Risk***

Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of the PUF's non-U.S. dollar investments. There are no limitations on investments in non-U.S. denominated bonds or common stocks in relation to the PUF's total fixed income and developed country equity exposures in the PUF's investment policy statement

During the year ended 2009, one of the PUF's external managers employed an investment strategy in which they hedged their long non-U.S. investment positions back to the U.S. dollar by utilizing currency transactions in amounts equal to the long investment position. During the year ended August 31, 2010 they changed their strategy to hedge their investments against the Euro dollar. In the following table the negative amounts shown for the Canadian Dollar, Czech Koruna, Danish Krone, Euro, Hong Kong Dollar, Norwegian Kroner, Swiss Franc, and the UK Pound in the cash and cash equivalents section reflect these strategies. The negative amounts offset long positions presented in the domestic and foreign common stock section.

**(G) Counterparty (Credit) Risk**

The derivative instruments utilized by the PUF contain varying degrees of off-balance sheet risk whereby changes in the fair values of securities underlying the financial instruments may exceed the amounts recognized in the statement of changes in fiduciary net assets. The PUF manages these risks on an aggregate basis along with the risks associated with its other investments as part of its overall risk management process.

The PUF had gross counterparty exposure as of August 31, 2010 and 2009 for options, swaps, and foreign currency exchange contracts as shown in the following table.

<b>Options</b>

As of August 31, 2010 and 2009, the PUF also had investments in futures contracts. Futures contracts expose the PUF to minimal counterparty credit risk since futures are exchange traded and the exchange's clearinghouse, as counterparty to all exchange traded futures, guarantees the futures against default.

Counterparty risk for swaps, options and foreign currency exchange contracts is mitigated by having master netting arrangements between the PUF and its counterparties, and by the posting of collateral on a daily basis by the counterparty to the PUF to cover the PUF's exposure to a counterparty above the limits set in place in each master netting agreement. Collateral posted by counterparties for net assets is held by the PUF in one of its accounts at the PUF's custodian bank. As of August 31, 2010 and 2009, the PUF held \$10,260,000 and \$17,372,805 respectively, of collateral related to derivative instruments other than futures, and had on deposit with brokers \$35,870,439 and \$1,338,839, respectively, as collateral related to derivative instruments other than futures.

## Note 4 – Securities Lending

In accordance with the prudent investor investment standards, the PUF loans securities to certain brokers who pay the PUF negotiated lenders' fees. These fees are included in investment income, and related expenses are included in investment expenses. The PUF receives qualified securities and/or cash as collateral against the loaned securities. The collateral, when received, will have a market value of 102% of loaned securities of U.S. issuers and a market value of 105% for loaned securities of non-U.S. issuers. If the market value of the collateral held in connection with loans of securities of U.S. issuers is less than 100% at the close of trading on any business day, the borrower is required to deliver additional collateral by the close of the next business day to equal 102% of the market value. For non-U.S. issuers, the collateral should remain at 105% of the market value of the

## PERMANENT UNIVERSITY FUND

Notes to Detail Schedules of Investment Securities (cont.)

loaned securities at the close of any business day. If it falls below 105%, the borrower must deliver additional collateral by the close of the following business day. The value of securities loaned and the value of collateral held are as follows at August 31, 2010 and 2009:

Securities on Loan	2010 Value	2009 Value	Type of Collateral	2010 Value of Collateral	2009 Value of Collateral
U.S. Government	\$ 17,968,851	\$ 23,724,480	Cash	\$ 18,339,962	\$ 24,207,632

Common Stock	\$ 1,746,980	\$ -	Non-Cash	\$ 1,783,972	\$ -

Cash received as collateral for securities lending activities is invested and reinvested in a commingled pool managed exclusively for the benefit of the PUF, the General Endowment Fund (GEF), the Intermediate Term Fund (ITF) and other UT Board accounts that participate in securities lending activities by the securities lending agent. The pool is managed in accordance with investment guidelines established in the securities lending contract between the PUF and its securities lending agent. The maturities of the investments in the pool do not necessarily match the term of the loans, rather the pool is managed to maintain a maximum dollar-weighted average maturity of 60 days and an overnight liquidity of 20%. Lending income is earned if the returns on those investments exceed the rebate paid to borrowers of the securities for interest on the cash collateral received. The income remaining after the borrower rebates is then shared by the PUF and the securities lending agent on a contractually negotiated split. If the investment of the cash collateral does not provide a return exceeding the rebate or if the investment incurs a loss of principal, the payment of the shortfall to the borrower is made from the PUF and the securities lending agent in the same proportion as income is shared.

The PUF's pro-rata share of collateral pool investments, rating by NRSRO, and weighted average maturity at August 31, 2010 and 2009 is shown in the following table:

Description	August 31,					
	2010			2009

## PERMANENT UNIVERSITY FUND

*Notes to Detail Schedules of Investment Securities (cont.)*

---

Collateral pool investments are uninsured, and are held by the PUF's securities lending agent, in its name, on behalf of the PUF, except for the investments in repurchase agreements which are held in the securities lending agent's name by a third party custodian not affiliated with the PUF or the borrower of the associated loaned securities. Therefore, the collateral pool is not exposed to custodial credit risk because the pool investments are not held by counterparties to the lending transactions or the counterparties' trust department or agent.

Cash collateral is recorded as an asset with an equal and offsetting liability to return the collateral on the statements of fiduciary net assets. Pool investments are valued at cost which because of the nature of these investments is indicative of fair value. Investments received as collateral for securities lending activities are not recorded as assets because the investments remain under the control of the transferor, except in the event of default.

In the event of default, where the borrower is unable to return the securities loaned, the PUF has authorized the securities lending agent to seize the collateral held. The collateral is then used to replace the borrowed securities where possible. Due to some market conditions, it is possible that the original securities cannot be replaced. If the collateral is insufficient to replace the securities, the securities lending agent has indemnified the PUF from any loss due to borrower default.

As of August 31, 2010 and 2009, the PUF had no credit risk exposure to borrowers because the amounts the PUF owed to borrowers exceeded the amounts the borrowers owed the PUF.

There were no significant violations of legal or contractual provisions, no borrower or securities lending agent default losses, and no recoveries of prior period losses during the years ended August 31, 2010 and 2009.

### **Note 5 – Investment Funds**

Investment funds include exchange traded funds, index funds, Securities and Exchange Commission regulated mutual funds, externally managed funds, limited partnerships, and corporate structures which are generally unrated and may be unregulated. The composition of investment funds at August 31, 2010 and 2009 is summarized in the table below as they are classified within the asset mix of the PUF.

The PUF invests in hedge funds through unit interests in investment pools established in the name of the UT Board. Amounts presented in the PUF financial statements and related note disclosures represent the PUF's pro-rata share of these investment pool assets. The hedge fund pools are invested in private placements with external investment managers who invest in equity and fixed income securities of both domestic and international issuers. Included in emerging market equity under hedge funds is an August 31, 2009 investment in the amount of \$13,390,000 to the emerging market equity pool which was not invested in the underlying hedge fund pool investment until September 1, 2009. These investment managers may invest in both long and short securities and may utilize leverage in their portfolios. The funds invested may be subject to a lock-up restriction of one or more years before the investment may be withdrawn from the manager without significant penalty.

## PERMANENT UNIVERSITY FUND

*Notes to Detail Schedules of Investment Securities (cont.)*

---

There are certain risks associated with these private placements, some of which include investment manager risk, market risk, and liquidity risk, as well as the risk of utilizing leverage in the portfolios. The hedge fund pools have committed \$27,579,189 of future funding to various hedge fund investments as of August 31, 2010 of which the PUF's pro-rata portion is \$13,687,551.

The PUF invests in private investments in investment pools created in the name of the UT Board. Amounts presented in the PUF financial statements and related note disclosure for the periods ending August 31, 2010 and 2009, represent the PUF's pro-rata share of these investment pool assets. The private investment pools are invested in limited partnerships with external investment managers or general partners who invest primarily in private equity securities. These investments are domestic and international, are illiquid, and may not be realized for a period of several years after the investments are made. There are certain risks associated with these investments, some of which are liquidity risk, market risk, event risk, and investment manager risk. Certain of these investments are held through limited liability companies, of which UTIMCO is the sole managing member. The private investment pools have committed \$2,453,783,015 of future funding to various private market investments as of August 31, 2010 of which the PUF's pro-rata portion is \$1,559,625,713.

Public market funds are invested in exchange traded funds, index funds, and private placements with external investment managers who invest in equity and fixed income securities of both domestic and international issuers. These funds are characterized as public market funds based on individual risk/return characteristics and their relationship to the overall asset mix of the PUF. Some of these investment managers may invest in both long and short securities and may utilize modest leverage in their portfolios. There are certain risks associated with these investments, some of which are investment manager risk, market risk, and liquidity risk, as well as the risk of utilizing leverage in the portfolios.

The PUF, in conjunction with the GEF and the ITF, invests in certain long-only public markets managers in separate investment pools created in the name of the UT Board. The PUF, the GEF and the ITF are the sole investors in these pools, and therefore, jointly own 100% of the assets of these separately managed accounts. The net assets of these pools have been allocated based on the proportional unit ownership of the PUF, the GEF and the ITF, and the PUF's pro-rata share of the net assets and have been consolidated into the statements of fiduciary net assets, the statements of changes in fiduciary net assets, and the accompanying note disclosures.

Hedge funds, private investments, and public market funds include investments in private placement vehicles that are subject to risk which could result in the loss of invested capital. The risks include the following:

- *Non-regulation risk* -- Some of the PUF's general partners and investment managers are not registered with the Securities and Exchange Commission or other domestic or international regulators, and therefore are not subject to regulatory controls.
- *Key personnel risk* -- The success of certain funds is substantially dependent on key investment managers and the loss of those individuals may adversely impact the fund's performance.
- *Liquidity risk* -- Many of the PUF's investment funds may impose lock-up periods which would cause the PUF to incur penalties to redeem its units or prevent the PUF from redeeming its shares until a certain period of time has elapsed.

## PERMANENT UNIVERSITY FUND

*Notes to Detail Schedules of Investment Securities (cont.)*

---

- *Limited transparency* -- As private placement investment vehicles, these funds may not disclose the holdings of their portfolios.
- *Investment strategy risk* -- These funds often employ sophisticated investment strategies and may use leverage which could result in the loss of invested capital.

Investments in hedge funds, private investments, and public market funds are also subject to the investment risks discussed in Note 3, including custodial credit risk and foreign currency risk. Fixed income investments held by these funds would also be subject to credit risk and interest rate risk; moreover, they may invest in securities whose fair values would be sensitive to changes in interest rates.
